MUSIC EDUCATION

LOU AND JACK FINNEY CONCERT HALL

New 68,500-SF music building supports the school's strong and growing program. The new facilities include a 530-seat concert hall and an 85-seat recital hall, several large rehearsal spaces for both choral and instrumental ensembles and many other acoustically critical teaching and practice rooms.

In addition to acoustical consulting, AD provided Audio/Visual Systems Design Services including sound reinforcement and recording systems, video projection systems, and associated control systems for the Concert Hall, Recital Hall and Recording Studios. Design also included AV systems for the large rehearsal rooms and teaching spaces which incorporated distance learning systems for multi-institutional collaborations.
